

Nathan Tran

nathan.tran04@sjsu.edu | linkedin.com/in/nthntrn | github.com/n8thantran | n8thantran.github.io

EDUCATION

San Jose State University

San Jose, CA

Bachelor of Science in Computer Science

Expected Graduation: May 2027

Organizations: Software and Computer Engineering Society, Mozilla Responsible Computing Club

Relevant Coursework: Data Structures and Algorithms, Object Oriented Design, Computer Architecture

EXPERIENCE

Ego (YC W24)

Nov. 2024 – Mar. 2025

Software Engineering Intern

San Francisco, CA

- Enhanced Roblox game by implementing LLMs, improving conversation coherence and engagement by 20%
- Developed Discord mini-game with Claude API integration, reaching 1.5K active users within first month of launch
- Engineered automated QA testing framework using LLM agents for efficient bug detection and gameplay testing
- Optimized FastAPI backend through caching and query handling, reducing average response times by 15%

Uber

Nov. 2024 – Present

Software Engineering Fellow

Remote

- Selected for elite fellowship program (2.9% acceptance rate) focused on engineering principles and system design
- Mastering data structures and algorithms through weekly technical challenges and mock interview sessions
- Collaborating with Uber engineers in bi-weekly mentorship sessions for code reviews and technical guidance
- Building full-stack projects while learning industry best practices through structured GitHub feedback

SJSU Software & Computer Engineering Society

Sept. 2024 – Present

Development Team Officer

San Jose, CA

- Led a team of 15 students to develop a fullstack checkout page, increasing snack room sales by 30%
- Created and hosted 10+ workshops on web and backend development, boosting engagement by 40%
- Provided guidance during weekly office hours for 20+ students, improving project completion rates by 25%
- Managed GitHub organization, overseeing code reviews and pull requests, reducing merge conflicts

PROJECTS

CanvAI | *Next.js, Typescript, Python, Supabase, FastAPI, Gemini API, LangGraph, LangChain*

- Built Chrome extension with Gemini API to provide AI-powered TA-like assistance for Canvas courses
- Implemented LangGraph workflows to process Canvas materials and generate study sets from PDFs
- Designed document parsing system using LangChain to extract concepts and create flashcards
- Integrated Canvas API with LangGraph agents to automate assignment tracking and deadlines

A.V.A (Accessible Voice Assistant) | *Python, FastAPI, Groq, Perplexity, LangChain, ElevenLabs*

- Identified accessibility gaps and built a voice-controlled browser navigation tool reaching 90% command accuracy
- Tackled slow AI response times by implementing Groq and Perplexity Sonar, reducing latency by 65%
- Developed agentic AI solution with LangChain, enabling users to automate email writing and flight booking
- Won **Best Multimodal Use of Groq** prize against 36 competing teams

DreamScapes | *Meta Quest 3, Unity, C#, Python, PyTorch, FastAPI*

- A real-time VR application that uses voice descriptions to render an immersive 3D environment
- Architected FastAPI backend reducing voice-to-3D scene generation time from 2 minutes to 30 seconds
- Built dynamic VR asset loading system supporting real-time scene updates for seamless user experience
- Won **Best Use of AI in XR** and **Best Use of AWS** prizes out of 60 teams at Stanford XR hackathon

TECHNICAL SKILLS

Languages: Python, Java, C#, Javascript, Typescript, HTML/CSS

Frameworks & APIs: React, Next.js, FastAPI, Flask, Discord API, OpenAI API, ElevenLabs, Groq, Perplexity

Developer Tools: Git, Docker, VS Code, Visual Studio, Unity, Meta Quest SDK, Roblox Studio

Libraries: LangChain, NumPy, Scikit-Learn, PyTorch, Pandas, BeautifulSoup4, Matplotlib

Databases & Auth: MongoDB, Supabase, Google OAuth
