EDUCATION

San Jose State University

San Jose, CA

Bachelor of Science in Computer Science

Expected: May 2027

Relevant Coursework: Data Structures and Algorithms, Object Oriented Design, Computer Architecture

EXPERIENCE

BloxShield

June 2025 – Present

Software Engineering Intern

Remote

- Built digital safety platform protecting 100M+ users across top Roblox games, scanning 100K+ DAU for threats
- Developed 5-service AWS ECS cluster using Terraform with automated CI/CD pipelines
- Constructed automated detection engine with rule-based systems and OCR models for threat pattern recognition
- Created Next.js dashboard with real-time analytics, WebSocket connections, and PostgreSQL audit logging

Ego (YC W24)

Nov. 2024 – Mar. 2025

Software Engineering Intern

San Francisco, CA

- Enhanced Roblox game by implementing LLMs and tooling, improving conversation engagement by 20%
- Developed Discord mini-game with Claude API integration, reaching 1.5K MAU within first month of launch
- Implemented automated game testing pipeline using AI agents to streamline quality assurance and bug detection
- Optimized FastAPI backend through caching and query handling, reducing average response times by 15%

Uber

Nov. 2024 – Sept. 2025

Software Engineering Fellow

Remote

- Selected for competitive 7-month fellowship program with 4% acceptance rate from 2000+ applicants
- Paired 1:1 with Senior Uber Engineer mentor for bi-weekly code reviews and technical guidance
- Completed structured curriculum of 5 technical workshops covering DSA and software engineering best practices

SJSU College of Engineering

Sept. 2024 – Nov. 2024

Software Engineering Intern

San Jose, CA

- Designed custom speaker control system using Pygame as the user interface, enabling intuitive audio management.
- Processed and fulfilled 100+ daily song requests with real-time queueing and playback features.
- Integrated Prometheus monitoring to track speaker metrics, reducing troubleshooting time by 30%.
- Refactored audio request handling pipeline, achieving 95%+ uptime and minimizing downtime between tracks.

PROJECTS

Juri | *Next.js, ShadCN, LangChain, NVIDIA Nemotron*

- Built AI legal assistant for startups that can answer questions about the law and provide legal information
- Engineered a document parsing system to fill out PDFs and Legal Forms with 95% accuracy
- Created legal scenario database with 50+ case studies, helping founders assess regulatory risks and outcomes
- Won **Top 5 Finalist** at NVIDIA's World Smallest Hackathon out of 70+ teams from across the country

Filosophy | *Python, FastAPI, LlamaIndex, MongoDB, Next.js, Google Gemini API*

- Built AI platform to auto-fill medical forms from video input, helping immigrants navigate healthcare in the US
- Designed an ETL pipeline to extract transcripts, store data, and fill relevant form fields using Google Gemini API
- Winner of **Best Biotech** and **Best People of Color Empowerment** awards out of 75 teams at SFHacks 2025

A.V.A (Accessible Voice Assistant) | *Python, FastAPI, Groq, Perplexity, LangChain, ElevenLabs*

- Built voice-controlled browser tool for 2.7M+ physically disabled users, achieving 90% voice command accuracy
- Tackled slow AI response times by implementing Groq and Perplexity Sonar, reducing latency by 65%
- Developed agentic AI solution with LangChain, helping disabled users automate email writing and flight booking
- Won **Best Multimodal Use of Groq** prize against 36 competing teams at HackHayward 2025

TECHNICAL SKILLS

Languages/Frameworks: Python, Java, C#, HTML/CSS, Typescript, SQL, React, Next.js, FastAPI

Developer Tools: Git, Docker, VS Code, Visual Studio, MongoDB
